2024

Dear Supporters,

We are excited to bring you updates on the latest activities of our team in the month of April. From empowering girls and women through ICT, Beautician and Tailoring courses to creating pathways to independence and stability. The team has been working tirelessly to make a positive impact in the lives of those in need. Join us as we share the stories of hope and progress from our programs and initiatives in April.

The Summer Camp

The kids from primary and secondary schools are on their summer break, so we wanted to make sure those who stayed home had a fun time.

We set up a Summer Camp with cool activities like workshops, games, and plays to give the kids a chance to relax and have a blast. Our goal was to create a space where they could have fun, show off their skills, and create memories to last a lifetime.

Making a world of difference

During the Summer Camp, the children had a great time doing activities that sparked their imagination and brought them together. With tasty drinks and snacks provided, the kids got to chill out and enjoy spending time with their friends in a cozy setting.

We want to give a big thank you to the interns from St. Joseph's University and Christ University who helped out with social work. These awesome students volunteered their time to make the Summer Camp a success, inspiring both the kids and our team.

Reflecting on the Summer Camp, we're reminded of how powerful teamwork can be in helping our youth grow and shine. A huge shoutout to our volunteers, interns, and hardworking staff for making a positive impact on the kids in Bangalore.

Computer courses

We continued to provide computer lessons for girls in different communities in April. Our commitment to empowering young girls through education and skill-building remains at the forefront of our work, and we are proud to offer basic computer lessons, graphic design and Tally courses to help them develop valuable skills for the future.

Computer Skills Are Vital for Girls:

In today's digital age, computer literacy is a fundamental skill that opens up a world of opportunities for personal and professional growth. By equipping girls with computer skills, we are providing them

with the tools they need to pursue higher education, access online resources, and thrive in a technology-driven world and get good jobs. Developing these skills

The Importance of Social Media Awareness:

In addition to computer skills, Planet Hope Asia has included social media awareness in the training programs. As young girls navigate the online world, it is crucial for them to understand the implications of their online presence, the importance of digital privacy, and

the potential risks associated with social media usage. By educating girls about responsible and safe online behavior, we aim to empower them to make informed decisions and protect themselves in the digital space.

Fostering Confidence and Empowerment:

Through our computer lessons and social media awareness initiatives, we are creating a supportive environment where girls can learn, explore, and grow. By providing them with the necessary skills and knowledge, we are empowering them to become confident and capable individuals who can contribute meaningfully to their communities and families. We believe that every girl has the potential to achieve her dreams, and we are committed to nurturing that potential through education and support.

As we continue our efforts to empower girls through computer lessons and social media awareness, we are grateful for the unwavering support of our volunteers, donors, and partners who make our programs possible. Together, we are making a positive impact on the lives of girls in different communities and helping them build a brighter future.

Empowering Women Through Tailoring Courses

We continued our commitment to empowering women by offering tailoring courses to those in poor circumstances. This year, a new batch of women embarked on a journey to learn the art of tailoring, with the goal of gaining the skills needed to work for an employer or start their own business. These courses are not only equipping women with valuable

vocational skills but also empowering them to take control of their lives and provide for their families, including their children's education.

The tailoring courses provide women with the opportunity to develop a sustainable source of income and financial independence. By learning how to sew and tailor garments, these women are not only enhancing their employability but also gaining the confidence and skills needed to pursue entrepreneurial ventures. The ability to create and

sell their own clothing products empowers these women to become self-reliant and secure a better future for themselves and their families.

Creating Opportunities for Growth and Stability:

By participating in the tailoring courses offered by Planet Hope Asia, women in poor circumstances are gaining the skills and knowledge needed to improve their socioeconomic status. Whether they choose to work for an employer or start their own business, these women are taking steps towards financial stability and independence. Through education and vocational training, they are breaking the cycle of poverty and paving the way for a brighter future for themselves and their children. Planet Hope Asia is helping women to take control of their lives, uplift

their families, and contribute positively to their communities.

Helping Women Learn Beauty Skills

Last month, Planet Hope Asia continued to help women by teaching them beauty skills. A new group of women started learning about skincare, makeup, and beauty treatments. They want to be able to work in a beauty salon or start their own business. These courses are giving these women important skills and independence to support themselves and their families, including their children's education.

Learning beauty skills gives women the chance to work in beauty salons or even start their own businesses. By becoming skilled at providing beauty services, these women are not only growing professionally, but also gaining the confidence to have successful careers. Being able to offer beauty

services helps them earn money, care for their families, and have a better future for themselves and their children.

Creating Paths to Independence:

Through the beauty courses at Planet Hope Asia, women in tough situations are learning skills to become independent. Whether they choose to work in a salon or start a business, these women are taking important steps toward being financially secure. By investing in their education and training, they are breaking barriers and setting themselves up for success.

Empowering Women to Follow Their Dreams:

The beauty courses at Planet Hope Asia help women pursue their goals, build careers they enjoy, and contribute positively to society. By giving them the tools they need to thrive in the beauty industry, we are helping women in difficult situations change their lives for the better and create bright futures for themselves and their families.

Thank you

As we witness the transformative impact of girls and women by activities and courses we are grateful for the continued support of our volunteers and donors who make these programs possible. Together, we are creating a more equitable and empowered society where women have the opportunity to thrive and succeed.

Stay tuned for more updates and stories of hope from Planet Hope Asia in the coming months.
